About Me

Frontend Developer with experience in building responsive and user-friendly interfaces. Continuously improving my skills, exploring modern technologies, and focusing on performance and clean code. Strong communication skills and a positive, proactive mindset. Dependable and detail-oriented, with a strong commitment to quality and performance.

Education

- **Secondary Vocational Education in IT**
D. A. Kunaev College, Astana
Faculty: Computer Engineering and Software (CTSE)
- **Higher Education in IT**
Kazakh University of Innovation and Telecommunication Systems, Oral
Faculty: Information Systems (IS)

Courses

- **IT Academy "STEP"**
C++, Windows 7/10, PC fundamentals, VirtualBox, Linux
- **Programming School "Decode"**
HTML, CSS, JavaScript, React
- **"Joltap" Course**
Figma, Tilda, Adobe Photoshop, Adobe Illustrator

Skills

- I create modern, responsive web interfaces with a strong focus on both functionality and visual appeal. My goal is to build fast, user-friendly, and intuitive websites that provide a seamless user experience.
- I write clean and maintainable code, ensuring that other developers can easily understand, scale, and support the project in the future. I pay close attention to performance, usability, and best development practices.
- I also consider SEO optimization and responsive design to ensure websites are well-indexed by search engines and display consistently across mobile devices, tablets, and desktops. Additionally, I focus on UI/UX principles to deliver well-structured and user-centered interfaces.

- I have experience working with advanced frontend and creative technologies such as Barba.js, GSAP (ScrollTrigger), and Three.js, as well as basic 3D modeling using Blender. I also work with design tools like Adobe Photoshop and Canva, and have experience with Arduino for interactive solutions.
- I am continuously expanding my skill set, with a focus on improving cross-browser compatibility and building scalable frontend applications.
